Team Name **Meeting Minutes**
Date 4/14/2021

<u>Attendees:</u> List all team members and ~~strike out~~ those missing

All in Class

<u>Items Discussed and Decisions Made:</u>
- Group 1(Chris Lebovitz, Courtney Hill, James Setliff, Kacheef White, Charles Young): James was the team leader who present DevOp and stated what did and did not work through the development process, Chris introduced the idea of Develop a multifaceted task board with a built-in chat function. Courtney discussed design aspects such as the layout, and the functionality of adding/removing task and columns. Kacheef set up the database that would store data from the task board and the chat and return it back to the client in real time. Charles contributed to the settings page and help construct the file writing to a json of the user information.
- Group 2 Shift (Steven Davis, Cody Ezell, Corey Welborn, Matthew Crocker, Zachary Light): Inventor App Development Quik Ventory. The group ran into similar problems due to the use of a new language. Can scan item but not much past the storage or access of the scanned item. Feedback from the group indicates that cotlin and the android studio is not as user friendly… Use Java
- Group 3 (Sarah Wathke, Hritik, Pathak, Rebecca Grantland, Zachary Jones) Virtual Zoo Guide is an interactive webpage where the user can click a region of the map and be redirected to a new page with information of the region that was selected and a list of animals in the region. The user can then select an animal and display information on the selected animal. There is a back button that lets the user navigate back to the home page.
- Group 4 (Christian Schmachtenberger, Hunter Johnson, Jackie, Diep, Joshua Mcgehee, James Rinehart, Durlab Man Sherchan) EcoCosts is for users to manage their finances concerning their stocks and financial counts. User login is implemented along with page navigation. Add/Removal of stock information and banking information was implemented.
